How to install a FIDO token in your Microsoft environment

Important note:

Please make sure your IT team has activated the "security key" option in Azure Active Directory

	<u> </u>

Go to myaccount.microsoft.com and sign in and select Security Info.

A Overview	Security info	
$\mathcal{P}_{\!\!\mathcal{P}}$ Security info	These are the methods you use to sign into your account or reset your password.	
Organizations	Default sign-in method: Phone - text + Change	
-	+ Add sign-in method	
💻 Devices	S Phone	
Privacy		

Select Add sign-in method, and then select Security key from the Add a method list.

Add a method		
Which method would you like to add?		
Security key		~
	Cancel	Add

Select Add, and then select the type of security key you have, either USB device or NFC device.

Security key	
Choose the type of security key that you h	ave.
NFC device	
	Cancel

- Make sure that you have your security key physically Δ available, and then on the Security key page, select Next.
 - In the Setting up your new sign-in method page, select Next, and then insert your security key into the USB port of your device.
 - Type your unique security key PIN into the Windows security box, and then select **OK**. You'll return to the **Setting up** your new signin method box.

8

Return to the **Security info** page, type a name you'll recognize later for your new security key, and then select Next.
